Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Fishler (5,930,109). Fishler discloses in Fig. 1 a capacitor (10) having a casing (14, 20) providing an enclosure; a first anode (32a) contained inside the casing; the first anode (32a) having a first feedthrough (42) electrically connected thereto and extending outside the casing, wherein the first feedthrough is insulated from the casing; a second anode (32b) contained inside the casing, the second anode (32b) having a second feedthrough (44) electrically connected thereto and extending outside the casing, wherein the second feedthrough is insulated from the casing; a cathode (30) of a cathode active material contained inside the casing and operatively associated with at least a portion of each of the first and second anodes (32a, 32b); and an electrolyte (col. 2, lines 3-9) provided inside the casing to operatively associate the cathode active material with the first and second anodes (32a, 32b). Regarding claim 14, wherein the casing comprise first and second portions which the examiner is relying on in the housing (14) which shows sidewalls all around the housing (14), therefore the first portion of the housing (14) has a first face wall extending to a surrounding first sidewall, and a second portion having a second face wall extending to a surrounding second

sidewall, and wherein the first and second sidewalls are secured together to provide the casing.

Allowable Subject Matter

2. Claims 2-13 and 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The following is a statement of reasons for the indication of allowable subject matter: Regarding claims 18-21, the allowability in combination with the claimed features is because nowhere in the prior art is there a first anode being positioned in a first casing and a second anode being positioned inside the second casing portion.

Citation of Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
